SUMMARY

I offer professional translation, localization, editing and proofreading services. My key principle is “jointless translation”. It means that a translation should read like an original. My aim is to establish a long-term win-win cooperation. Now I’m permanently working with over 20 translation agencies and a lot of direct customers (companies and individuals). My experience in this field is over 8 years. My daily output is up to 2000 words per day.
